EDUCATION

St. Xavier's College, Mumbai · B.Com, Accounting and Finance

Aug 2022 – Apr 2025

WORK EXPERIENCE

Stealth Startup, Mumbai · Growth Associate

Apr 2026 – May 2026

- Stood up outbound sales infrastructure in 48 hours, by authoring cold-call scripts adopted as the team's standard playbook
- Sustained pipeline coverage at 70+ B2B cold calls daily, by owning lead qualification and follow-up through conversion
- Brought a new hire to full productivity within the same 48 hours, by transferring the end-to-end outbound process

Stealth AI Startup, Mumbai · Operations Intern

Sep 2025 – Apr 2026

- Aligned priorities with company goals across daily operating decisions, by working directly with the CEO on execution plans
- Reduced defects reaching users across every release cycle, by owning end-to-end product testing and flagging issues pre-launch
- Improved product iterations each build cycle, by feeding practical input into the Tech team

Content Whale, Mumbai · Business Development Executive

Jun 2025 – Sep 2025

- Beat monthly meeting targets by 34%, by running structured outreach and pipeline management across B2B clients
- Converted cold outreach into qualified opportunities across the full sales cycle, by managing prospecting through closure
- Shortened average sales-cycle response time, by building proposals tailored to each client's content-strategy brief

TECHNICAL & QUANTITATIVE PROJECTS

Spotify Take-Private LBO · Excel, 10-tab integrated model

2026

- Tested whether a €106.8bn EV take-private (30% premium, \$637.39/sh; 32.5x FY26E Adj. EBITDA) clears a 20% IRR hurdle
- Built region-level subscriber × ARPU model feeding three statements, RCF cash sweep, ATAD 30% interest cap and Pillar Two top-up; 8 audit checks reconcile to zero
- Computed 11.1% gross / 8.4% net IRR (2.09x / 1.79x; Upside 17.7%, Downside -0.6%); 490 bps royalty step-down ≈ 0.45pp IRR per 10 bps/yr; recommended against proceeding (20% IRR needs a \$428 offer)

Vodafone Idea Restructuring & Liquidity Model · Excel, 7-tab scenario model

2026

- Compared going-concern restructuring against IBC liquidation on ₹2.54 trn of claims (~77% Govt dues) across four plans (A–D) with ₹42,071 cr dues-to-equity swap, spectrum moratorium and creditor haircuts
- Valued the going concern by DCF at ₹1.08 trn EV (8.0x exit multiple, 13.5% WACC; terminal value 93% of EV) with Gordon-growth cross-check and 13-week cash flow with liquidity-floor alerts
- Modelled IBC s.53 waterfall: Govt recovery 51% going concern (28–57% across bridge treatments) vs. 18.6% in liquidation; applied s.30(2)(b) creditor test

Trikosh (Founder; MIT) · Python, FastAPI, PostgreSQL, Next.js

trikosh.xyz

- Built an open-source equity research platform serving clean, comparable fundamentals for 200 companies across 6 sectors
- Loaded yfinance data into a PostgreSQL schema; standardised 5-year financials, pre-computed ratios and peer comps via rate-limited FastAPI endpoints
- Shipped live Next.js/Recharts peer-comparison dashboards with PDF/Excel export, Clerk authentication and documented data-quality limitations

RESEARCH PAPERS

When the Licence Becomes the Liability: IP Inversion in Licensing Relationships

Independent research, May 2026

Zombie Banks and Japan's Lost Decade: Hidden Bad Debt and Delayed Recovery

Independent research, 45 pp.

TECHNICAL SKILLS

Modelling: LBO, three-statement, DCF, 13-week cash flow, debt waterfall / cash sweep, sensitivity analysis, liquidation waterfall

Programming: Python (pandas, NumPy, Matplotlib), FastAPI, Next.js, PostgreSQL, REST APIs, GitHub Actions

Tools: Excel, Git / GitHub, SEC EDGAR, yfinance, Google Workspace
